SEVCO INC
DIV OF F.W. WEBB COMPANY

Engineered Products Group

The Engineered Products Group offers many different capabilities to our customers. Beyond the basic on-off actuation of quarter turn valves, we offer a full service valve actuation and repair capabilities. The Engineered Products Group combines the instrument, control and valve products to offer control solutions for your process applications. Skid systems to panel fabrication, we have the capabilities to do it all.

Customer specific and specified relay protection panels for electrical substations.

Finished skid system for ammonia metering and distribution to SCR Systems.

Safety Relief Valves

SEVCO is a factory authorized assembler for Conbraco and Crosby safety relief valves. Steam, air and liquid stands can cover valve sizes from 1/2" – 20" and pressures up to 5000 psig.

Flanged valve inventory up to 8" inlet in both carbon steel and cast iron.

Spring assemblies to cover all set pressure ranges are offered.

CONBRACO PRESSURE RELIEF VALVES

For Steam and Gas Service

19 Series – Cast Bronze
Overpressure protection of steam boilers, sterilizers, distillers and cookers, Pneumatic conveying equipment, air compressors, receivers and dryers. Steam, air and gas accumulators, pressure vessels and pressure piping systems.

119 Series – Cast Iron
Are flanged, heavy duty and high capacity safety valves ideal for overpressure protection of steam boilers, accumulators, pressure reducing stations & pressure piping systems, pneumatic conveying equipment, air and gas compressors, receivers and dryers.

CROSBY® SAFETY VALVES

Pressure Relief Valves for Steam, Gas, Liquid
Omni-Trim®

Provides overpressure protection for medium flow applications in refineries, chemical and petrochemical plants, and power plant auxiliary systems.

Isoflex Styles HE & HCl

For utility and industrial steam generators and steam systems.
